

A sheet of clear plastic (polycarbonate) forms protective barriers between people – coworkers, customers and those in transactional positions. These barriers allow face-to-face interaction but minimize the transmission of and exposure to germs, making it possible to continue business while keeping your staff and customers protected.

Adapt to your specific needs by cutting to size or adding additional features such as openings for credit card machines, slots for papers, spaces for cords and more.

All industries can and will benefit from the use of cough and sneeze guards, including:

- Food processing plants
- Transportation
- Grocery stores
- Hospitals
- Gas stations
- Retail locations
- Workspaces
- And more

Specifications:

Category:..... Plastic
 Type:..... Polycarbonate
 Code:..... PS-PC
 Thicknesses:..... 1/16" - 1/2"
 Sheet Sizes:..... 12" x 12", 12" x 24", 24" x 24", 24" x 48", 48" x 48", 48" x 96"
 Color: Clear
 Tensile Strength: 9,000 psi
 Temperature Range:..... -40° to 240° F
 Hardness:..... Rockwell R120
 Specs: UL 94 V-2
 Characteristics: Excellent impact strength and clarity. Commonly used for cough and sneeze guards as well as in signs, windows and machine guards.

Note: Dimensions given in inches unless otherwise specified.
